To: All Incident Personnel, Bastrop County Complex

As Southern Area National Type I Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated. Known or reported acts will be dealt with appropriately.

I am particularly concerned about the perception that alcohol has a place in any of the Incident facilities. It is not appropriate to indulge in alcoholic beverages during any fire assignment.

The National Team from the Southern Region has a policy of “NO ALCOHOL” from the time of dispatch until the time of physical release from the Incident. Members of the Team voluntarily comply with this policy; all incident personnel will be expected to do so also.

We endorse, support, and expect an attitude of mutual respect for all Incident personnel and the public we serve. We also, endorse the attitude and work ethic that places “Safety First, every time on every Incident.” We expect nothing less.

/s/ Tony Wilder
Incident Commander
Southern Area Type I Incident Management Team

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Bastrop County Complex	2. Operational Period: Date From: 09/11/2011 Date To: 09/12/2011 Day: 0800-2000 Night: 1830-0800															
3. Objective(s): 1. Provide for firefighter and public safety in all incident operations especially considering aviation operations, extreme drought impacted fuels, and natural and man-made hazards. 2. Coordinate incident suppression actions and assist state and local agencies and authorities responsible for assessment of infrastructure damage, large animal care and recovery and urban search and recovery operations to ensure the safety of all incident personnel. 3. Coordinate with state and local agencies to keep the public informed on fire danger and suppression actions. 4. Coordinate initial attack with local authorities in Bastrop County. 5. <u>Union Chapel</u> – Hold fire south of Union Chapel Road, -west of a line from Amanda Lane up to Leisure Lane, -north of State Highway 21, -East of McDonald Lane to Lakeview Drive to Still Foot Drive. 6. <u>Bastrop Fire</u> – Hold fire east of Bastrop, Lake Bastrop, and FM2336 -south of US 290 -west of Old Potato Rd, South Old Potato Rd, Antioch and Old Antioch Rd, and SR-95 -north of FM 2571 and Union Pacific Railroad Grade -protect against further structure loss																
4. Operational Period Command Emphasis: 																
General Situational Awareness

Fire Weather Forecast

FORECAST NO: 7

NAME OF FIRE: Bastrop Complex

PREDICTION FOR: Day-Night **SHIFT**

UNIT: Bastrop County

SHIFT DATE: Sunday, September 11th

SIGNED: Brent Wachter

TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: 1800 September 10th

WEATHER DISCUSSION:

Changes in the weather start today as an upper level ridge forms over most of the state. Temperatures will be well above normal with the century mark being reached through the forecast period. Even though the temperatures are hot....humidity values will rise some thanks to shallow surges of moisture from the Gulf of Mexico. This will make for good humidity recoveries. During the afternoon's, the higher morning humidity will mix out and produce a few hours of teen readings. Several hours of northerly winds will be behind us but look for strengthening southerly winds through the week...especially later in the week. As the winds become stronger...so will the transport of moisture from the Gulf. Rain is not forecasted for the next several days.

WEATHER FORECAST: ...LIGHT AND VARIABLE WINDS TODAY...

WEATHER: Mostly sunny with a few fair weather cumulus.

TEMPERATURES: Maximum: 99-100 degrees

HUMIDITY: Minimum RH: 15-17% (for 1 or 2 hours)

20 FT WINDS: South/Southwest 1 to 3 mph til around noon. Light and variable around noon and then a northerly flow developing mid/late afternoon 3 to 5 mph. Occasional gusts to 10 mph.

HAINES INDEX: 6 high during the peak heating period...otherwise a 5.

STABILITY/INVERSION: Inversion will break between 1200 to 1230. Weak transport winds most of the day but eventually becoming N-NE @ 7 mph after 1600. Mixing heights to around 9900 feet AGL.

OUTLOOK FOR SUNDAY NIGHT: Moderate inversion developing quickly after sunset. Good humidity recoveries.

Min Temp: 66-68 deg Max RH: 67-71%

Wind: Southerly 3 to 6 mph.

EXTENDED FORECAST MONDAY/TUESDAY: Above normal temperatures. A few cumulus possible during the afternoon but look for mostly sunny skies and mainly clear overnights. Fair recoveries

Max Temp: 100-103 deg Min Temp: 65-68 deg Min RH: 15 to 19% Max RH: 65-71%

Wind Monday: West/Southwest 3 to 7 mph.

Wind Tuesday: Southwest becoming South/Southeast during the afternoon. Speeds 4 to 8 mph. Occasional gusts to 15 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 9	TYPE OF FIRE: Wildfire
FIRE NAME: Bastrop Complex	OPERATIONAL PERIOD: September 11 th , 2011
DATE ISSUED: September 10th, 2011	TIME ISSUED: 1900
UNIT: TX-TXS	SIGNED: /s/ Andy Baker / Andy Baker FBAN (T)

INPUTS

WEATHER SUMMARY: (For full forecast refer to the Fire Weather Forecast)

****Moderating RH and Winds Today****

Today: Sunny skies. Max Temp: 98-100 degrees Min RH: 15-17%
Afternoon 20 ft. Winds: Variable 3 to 5 mph. Haines Index: 6

Tonight: Moderate inversion after sunset. Low Temp: 66-68 degrees Max RH: 67-71% Winds: South 3 to 6

Monday: Continued Dry and Hotter. Max Temp: 100-103 degrees Min RH: 15-19% Winds: WSW 3 to 7

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- While winds and RH are moderating slightly today, high potential for large fire growth still exists for any new starts, especially in timber fuel types.
- Short grass (Fuel Model 1): ROS - 10 to 28 ch/hr, FL - 2 to 4 ft
- Pine/Oak woodland with shrub component (Fuel Model 7): ROS – 7 to 18 ch/hr, FL - 3 to 6 ft
- With a Probability of Ignition of 89%, any spotting from torching trees is likely to be profuse with distances ranging from 100 yards to a maximum of 0.1 mile
 - ✓ 100 hr Dead Fuel Moisture (Bastrop RAWS) – 7%
 - ✓ 1000 hr Dead Fuel Moisture (Bastrop RAWS) – 10%
 - ✓ Herbaceous Live Fuel Moisture (Bastrop RAWS) – 14%
 - ✓ Woody Live Fuel Moisture (Bastrop RAWS) – 75%

SPECIFIC:

Divisions A/D/G/I/T/R/N/L/E/W: Any residual heat in snags and heavy downed fuels will pop up in the afternoon.

Divisions Z/I/Y: Any remaining interior pockets of unburned or partially burned fuels have the potential to clean themselves up in the afternoon.

Division V: Expect continued smoldering of snags and heavy downed fuels in the morning with the potential for active flame and spotting from snags or heavy downed fuels in the afternoon. Pay particular attention to the fire perimeter adjacent to Beuscher State Park as these mature woodlands have very heavy fuel loadings (downed 100-hour fuels and mature shrub/cedar in the mid-story) that will be very receptive to ignition and prove quite resistant to control.

AIR OPERATIONS:

- Expect inversion to break between 1200 and 1230.
- Afternoon mixing heights around 9900 feet AGL. Transport winds NNE at 7 mph.

SAFETY

- Shifting winds, while light and variable, do have the potential to push residual heat sources in unexpected directions and will require situational awareness.
- Unseasonably high temperatures and arduous mop-up work will require frequent breaks and attention to hydration.
- Given the lack of moisture in both the surface and canopy fuels, a running fire can quickly transition from active surface fire to torching to active crown fire.

ASSIGNMENT LIST (ICS 204)

1. Incident Name: Bastrop Complex		2. Operational Period: Date From: 9/11/2011 Date To: 9/11/2011 Time From: 0800 Time To: 2000			3. Branch: I Division: G/D

SAFETY MESSAGE

HAZARDS AND RISKS

Transportation: Driving is one of the most hazardous activities you will do. Driving on dusty/dirt roads with limited turnouts and very poor visibility is dangerous for everyone. Take your time, slow down, and be ready to stop quickly. Use your warning lights and be a defensive driver. Use chocks when parked & spotters for backing. **Be alert to the public and other agencies.**

Fuels & Fire Behavior: Be heads up with changing weather. Low winds may lull you into a false sense of security. **Keep informed on the fire weather conditions and forecasts.**

Communications: **Maintain prompt communications with your forces, your supervisor, and adjoining forces.** The ability to communicate well plays a major role in SAFETY! Please be respectful to any public that might enter your fire area.

Hot Dry Weather & Dehydration: Drink a little often rather than a lot infrequently; employ a 3 to 1 ratio of water to sport drinks. Pace yourself and keep eye out on fellow firefighter. **Also everyone should Work to maintain the 2:1 Work to rest Guidelines. This will help Mitigate fatigue. Don't get on complacent**

Down Powerlines: Treat all powerlines as charged until cleared. Use caution when walking especially after dark, they can also become serious tripping hazards. **There are Utility crews working inside the fire perimeter so be alert to there movment.**

MOTIVATE Firefighters with a “can do safely” Attitude

Leader's Intent

Task – What is to be done

Purpose – Why it to be done

End State – How it should look when done

INCIDENT ACTION PLAN SAFETY ANALYSIS										1. Incident Name Bastrop County Complex		2. Date 09/11 – 9/12		3. Time 0800-2000; 1830-0800							
LCES* Analysis of Tactical Applications Lookouts Communications Escape routes Safety zones										Other Risk Analysis											
Division/Group	Downhill Fireline	Underslung Fireline	Indirect Fireline	Complacency	Frontal Assault	Anchor Points	Extreme conditions, spotting, wind driven, localized winds	Unburned area	Snags	Powerlines		Hazardous Materials	Transportation	Communications	Structure Protection	Multi-Aircraft	Night Operations				
										Top 5 LCES Mitigations											
G/D	*			4	*	*	2	*	*	*	1. Address defensive driving at briefings. Observe all traffic signs & signals and speed limits. Use spotter when backing vehicles. Maintain safe following distances. Be aware of bridge limitations with the heavy equipment haulers. Be alert to traffic when suppressing fire along public roads. Provide for traffic control. Some areas of fire will be open to the public so be alert to the public being in some areas. All crews need to be alert to the opening of H71 to thru traffic.	*	1	3	*	*	5	Use downhill checklist in IRPG before engaging in downhill line construction.			
																		Avoid frontal assault at all times. Use anchor and flank tactics to stop the head. Attack from the back.			
																		Establish LCES; Look up, Look down, Look around; know current weather and predicted weather and fire behavior.			
A	*			4	*	*	2	*	*	*	2. Establish LCES. Ensure fireline is anchored. All firefighters know current and predicted weather & fire behavior forecast; line supervisors provide clear, concise briefings. Ensure that lookout has view of resources constructing fireline.	*	1	3	*	*	5	Identify snags by communicating locations to personnel and flagging; establish control lines a safe distance from hazards; fell if necessary to ensure safety and if there are qualified personnel to accomplish.			
Z Y	*			4	*	*	2	*	*	*	3. Ensure that all personnel have radios cloned to incident communications plan. Line supervisors need to ensure that all personnel are able to scan appropriate channels in handheld radios. Be respectful and mindful if you are approached by public entering fire areas.	*	1	3	*	*	5	Refer to Urban Wildland Interface Watchout Situations in IRPG.			
																			*	1	3
T/R N/L	*			4	*	*	2	*	*	*	4. Stay focused on your task. Maintain good situational awareness. Maintain control of your forces at all times.	*	1	3	*	*	5	Power lines and fences can be both a driving hazard & a walking hazard. Burnt poles can become a snag-like hazard. Treat all lines as charged & use caution when walking especially after dark. Fences and downed lines can become a serious tripping hazard. Watch out for utility crews in your division.			
I/E	*			4	*	*	2	*	*	*	5. Use blinking or strobe lights or glow sticks on back of helmets or backpack so as to be seen by equipment operators. Maintain 200 ft. clearance in front of dozers and 100 ft. behind.	*	1	3	*	*	5	Recognize, communicate and avoid hazmat situations. Utilize hazmat response teams. Utilize pp. 24-26 of IRPG. Avoid trash dumps in line construction and avoid smoke from trash dumps.			
W	*			4	*	*	2	*	*	*		*	1	3	*	*	5	Utilize air attack to coordinate aircraft use. Monitor and use air-to-ground frequency. Stay clear of water and retardant drops. Ensure that firefighters know how to program radios to scan function. Establish LCES.

SOUTHERN AREA IMT INCIDENT WITHIN AN INCIDENT EMERGENCY ACTION PLAN

Introduction

An emergency such as a helicopter accident, firefighter entrapment or burnover, camp evacuations, vehicle accident, medical emergency or other unknown emergency condition could occur on any of the wild fires or all-risk incidents we may be assigned. This may result in serious injuries or fatalities, and periods of extreme stress. This is called an “incident within an incident (IWI).”

Assignments may be in remote or severely impacted locations that result in longer than normal response times for local emergency response personnel; therefore, the team is responsible for handling the situation professionally, timely and effectively.

The intent of this plan is to establish a process and protocol to effectively manage an emergency situation (IWI) while continuing to manage the primary incident with as minimum of distraction as possible.

General Procedures

In the event of an emergency IWI, notification will be made thru the chain of command to the Operations Section Chief and/or Safety Officer. The Operations Section Chief (OSC) will assume control of the emergency and promptly assign on-scene responsibility to an appropriate Division/Group Supervisor or other individual not directly involved with the incident. If OSC cannot be contacted, the highest qualified operations person or safety officer on scene will assume command of the emergency and take appropriate action.

The Incident Commander, Medical Unit Leader and Communications will be notified promptly. The IC will ensure that all remaining command and general staff are notified.

All incident personnel will be instructed by the OSC or Safety Officer to clear the designated radio channel for “emergency traffic” related only to the emergency situation. If OSC or Safety Officer cannot be contacted, the highest qualified person on scene will broadcast “emergency radio traffic.” If available, air attack will be over the incident to ensure clear communications are in effect and will be available as an airborne repeater if needed. In the event personnel are injured, when they have been loaded and being transported to the hospital or at an appropriate time, OSC or Safety Officer will announce on the radio that “emergency radio traffic” has been canceled.

Names of the injured or deceased individuals will not be transmitted on the radio.

To aid in an investigation, deceased individuals or their personal effects will not be moved except to accomplish rescue work or to protect the health and safety of others.

Those directly involved will provide written documentation of their actions. An ICS 214 may be utilized for the initial documentation, but a subsequent narrative will be required.

An After Action Review will be conducted after each emergency incident within an incident to determine strengths and needed improvements.

AIR OPERATIONS SUMMARY

Prepared By: T.Anderson

Prepared Date:9-10-2011

Prepared Time:1800

1. INCIDENT NAME: Bastrop County Complex	2. OPS PERIOD DATE: 09-11-2011	START TIME: 0800	END TIME: 2000	SUNRISE: 0711	SUNSET: 1941

FREQUENTLY ASKED QUESTIONS for 9/11/2011

Please refer to the Bastrop County website at www.co.bastrop.state.tx.us or the Bastrop County Office of Emergency Management Facebook page for fire information. Bluebonnet Electric has a restoration schedule map on their website at www.bluebonnetcoop.com.

Information on the website includes Road Closures, Maps of roads that have been re-opened, listing of destroyed structures

Frequently Asked Questions:

Which roads have been opened?

Hwy 21E from 95 to Loop 150
Hwy 21E from South Old Potato Road to Hwy 290
County Road 1441 from Hwy 95 to Rainbow
Hwy 71 to THROUGH TRAFFIC ONLY
Lovers Lane into the section of Tahitian Village west of Akaloa Drive

Which roads are still closed?

Hwy 21E from South Old Potato Road to Loop 150
Pine Path eastbound is closed at Old Firetower Road
Park Road 1C is closed at Old Antioch Road
Cottletown Road is closed at Antioch Road
Gotier Trace westbound is closed at Antioch Road
All roads in Tahitian Village east of Akaloa Drive

How can I make a donation or volunteer?

Call this number between 8am and 5pm:

Where can I get information about temporary shelter?

Call the shelter at Smithville Recreation Center at and press 7 when the recorded message comes on. They will have information about shelters in other areas as well.

What about animals?

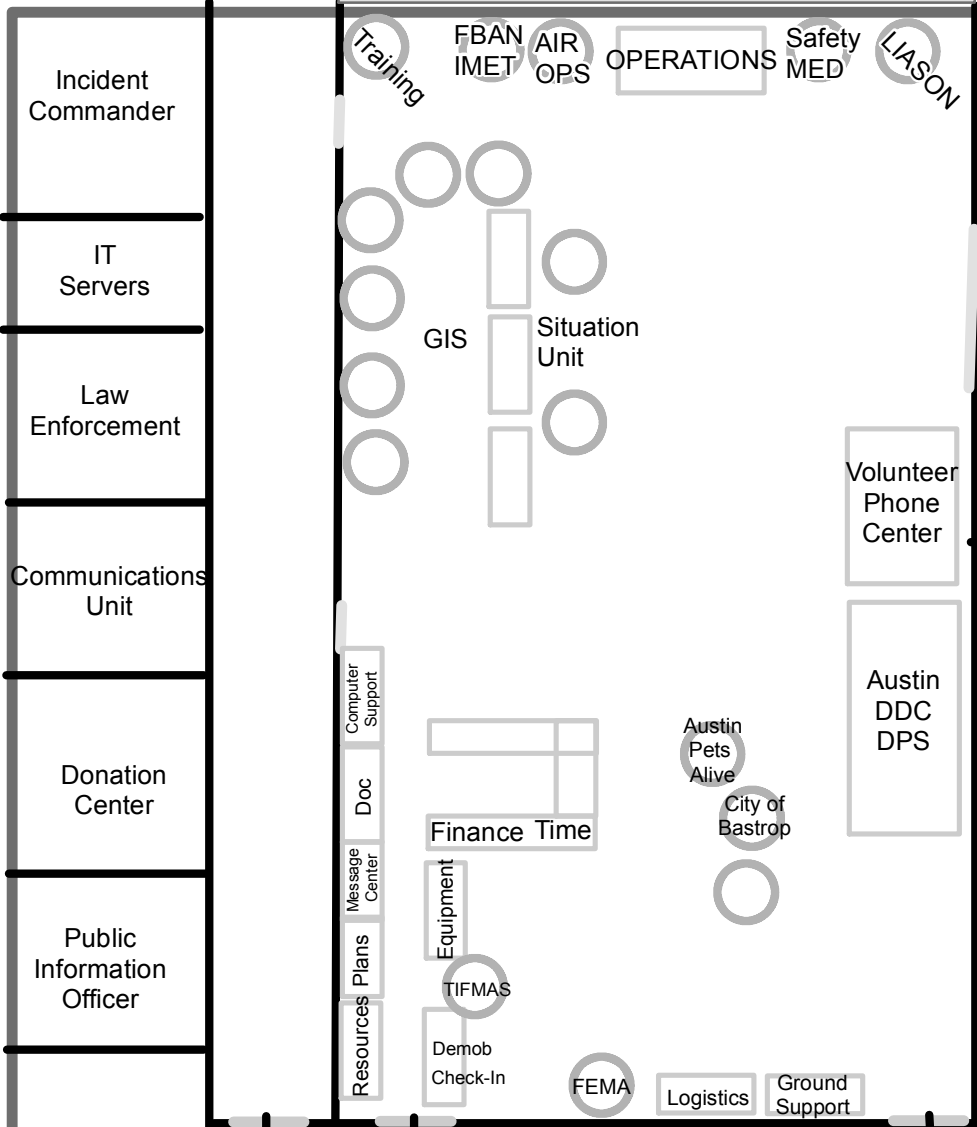

For dogs, cats, and small animals, contact Austin Pets Alive at They have information on pets rescued from the fire area by Animal Control. The Bastrop County Sheriff's Office livestock unit has also recovered some livestock, especially when reported from the field. Ranchers with large numbers of animals should contact the sheriff's office for an escort to feed or water animals.

Where can I call for assistance?

For housing assistance, call or www.DisasterAssistance.gov.

For local information or statewide services including housing, food, clothing, health care, support groups, disaster information and more, dial **2-1-1**.
